Common Challenges in Early Academic Courses

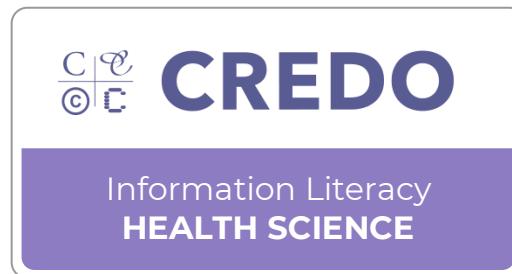

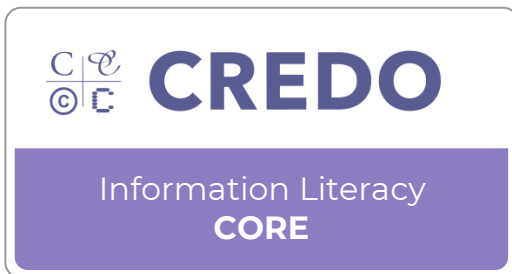

Faculty

- Need simple tools to engage students in their coursework while easily tracking student progress and engagement
- Need instruction-friendly material on a wide range of topics to complement their courses
- Need tools to assist students with basic information literacy & critical thinking tasks without spending valuable class time

Students

- Don't know where to start
- Overwhelmed by options - don't think of campus services 1st.
- Have difficulty evaluating resources.
- Unfamiliar with rules around copyright, plagiarism, and academic integrity.

Credo Information Literacy Modules

Credo Information Literacy modules are online tutorials to help students learn foundational information literacy skills. Credo provides a supplemental way for students to asynchronously complete foundational lessons on a wide range of topics such as getting started with research, to finding credible sources and recognizing bias, to citations.

Credo modules can be used:

- in Canvas
- in Library Guides or other web sites
- with direct links

Credo modules use the following to interactively deliver instruction to students:

- multimedia and video
- self-guided tutorials
- quizzes
- text

To review the modules, visit the [Information Literacy Tutorial LibGuide](#).

If you are interested in using the Credo modules our team would be happy to consult with you about ways to integrate these modules into courses or instruction. Please contact us at: ul-credo@PennStateOffice365.onmicrosoft.com.

[Faculty Extras](#)

Why is Information Literacy important?

Information Literacy (IL) refers to the ability to recognize a need for information and to find, analyze, and synthesize related material from books, articles, websites and more.

How Can IL Benefit Students?

A 2017 survey of 42,000 students in more than 1,700 courses at 12 major research universities showed that:

- Retention rates were higher for students whose courses included IL instruction.
- Students whose courses included IL instruction reported higher average first-year GPAs than those whose courses did not.
- Students who took IL instruction successfully completed 1.8 more credit hours per year than students who did not.

How Can IL Benefit Faculty?

Students who are information literate are better able to come up with workable topics for their papers, research those topics independently, and write papers that conform to rigorous academic standards.

Why is Critical Thinking important?

An ability to think critically is essential to a student's time in school and is a vital life-long skill.

Employers highly value critical thinking skills too, with a 2013 AAC&U study showing that "a candidate's demonstrated capacity to think critically, communicate clearly, and solve complex problems is more important than their undergraduate major."

It's not easy to teach students to adopt a new thinking style, in today's polarized environment, it can even be difficult to impart to them the importance of deliberate and critical thinking.

Video: Why IL Matters to Faculty

***NOTE FOR LIBRARIANS (DELETE AFTER CUSTOMIZING)**

This box is intended to display the Why IL Matters to Faculty video. You will need to add a Media/Widget asset to this box, and use your proxied embed code from the Link Constructor to allow instructors to view the video in this box.

For instructions on obtaining links to the multimedia, please visit our [Help Site: Link Constructor article](#).

Module 1 Learning Outcomes

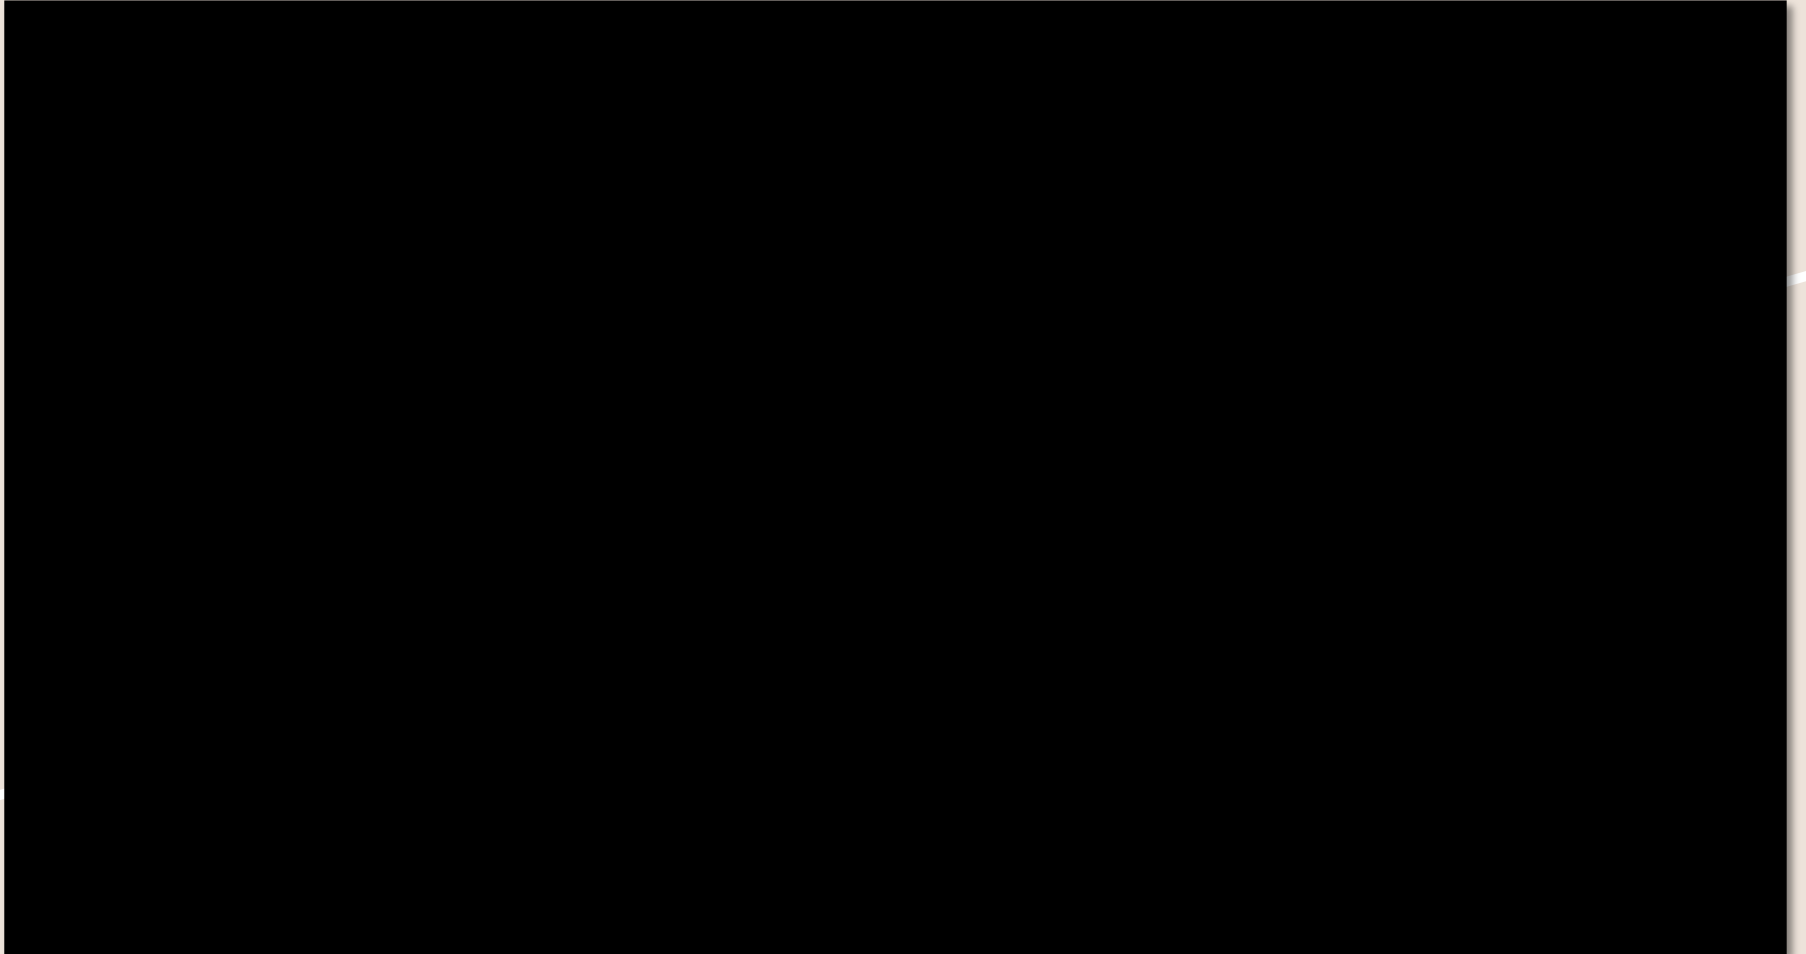

Students will be able to...

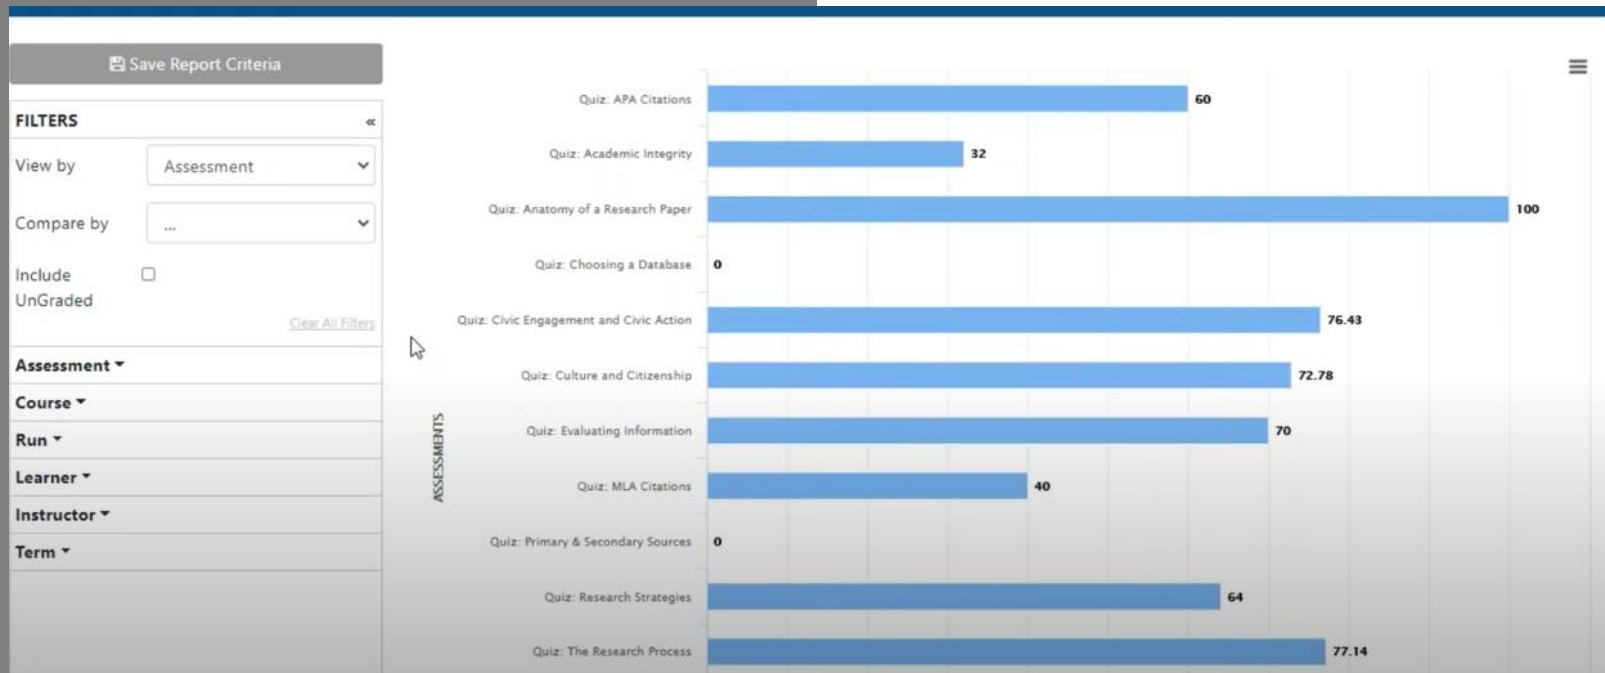

- Understand what information literacy is and why it is important in school, the workplace, and society.
- Know resources available to build information literacy skills.
- Identify how information is needed and used in everyday life.
- Set goals to build information literacy skills.
- Identify the steps in the research process.
- Develop a plan for a research paper.
- Choose a research topic.
- Identify keywords, synonyms, and related terms for a project.
- Recognize the iterative nature of the research process.

Adding Credo Items to Canvas

-  [How to Add Credo InfoLit Modules to Canvas](#)
You can add an individual video, tutorial, or quiz.

Customization is key when building lessons, and tutorials, and matching the expectations of learning outcomes!

Bethune-Cookman University - Core **InfoLit - Core**

Reference and Instruction Librarian Dr. Charles West White utilized the flexibility of InfoLit - Core's videos and tutorials to provide consistency and extend the reach of her library's instruction while meeting the needs of her online learning program.

Assessing the Growing Demand for Library Instruction

All digital communication channels available to the library to learn about reference services and resources. For our online faculty members, a new effort to provide consistent instruction. Additionally, the library's computer lab was unable to accommodate all users during their scheduled class time. The need to extend the reach of the library's instruction program. Librarians were asked to help assess the current demand for library instruction in an online environment.

Using InfoLit - Core "Go the Other" to Showcase the Faculty's Best and Efforts

Information Literacy, a foundational skill for all students, is a key component of the liberal arts education. The library's role is to provide instruction in this area. Our online faculty members, however, are not able to provide instruction in this area. The library's computer lab was unable to accommodate all users during their scheduled class time. The need to extend the reach of the library's instruction program. Librarians were asked to help assess the current demand for library instruction in an online environment.

ABOUT BETHUNE-COOKMAN UNIVERSITY

- Founded 1863
- Bethune-Cookman
- 10,000+ students
- Located in Jacksonville, FL

ABOUT THE LIBRARY

Dr. Charles West White, Reference and Instruction Librarian, is the lead of the library's instruction program. He is a former professor and has been at Bethune-Cookman University for over 20 years. He is a member of the American Library Association and the Association of College and Research Libraries.

ABOUT INFOLIT - CORE

InfoLit - Core offers consistent, self-paced instruction in information literacy skills. It is available in multiple languages and is accessible to all students. It is a valuable resource for both students and faculty members.

Bethune-Cookman University Case Study: Credo Information Literacy – Core

Nicholls State University - Core **InfoLit - Core**

When Instruction Librarian Beaudy Barkette needed a resource to help students learn information literacy (IL) skills, she turned to InfoLit - Core and its robust collection of ACRL-aligned videos, tutorials, and quizzes. During her trial period, she experimented with the platform to test the full range of options available in various workshop, one-on-one, and post-class instruction.

Addressing a Need in a Variety of Settings

Beaudy Barkette needed a resource that could be used in a variety of settings. She needed a resource that could be used in a variety of settings. She needed a resource that could be used in a variety of settings. She needed a resource that could be used in a variety of settings.

Building a Foundation of Support for a New Library Resource

How to Avoid Bias in Your Searches

© 2015 Credo Reference, LLC

1:03 / 1:03

Overview

- Encourages students to use neutral terminology to retrieve the most objective and relevant sources.
- Directs students to seek a balanced understanding of their research topic by consulting a variety of sources.

More Quick Tips

With the advantage of being less encumbered politically and financially than the government, private companies have long been expected to enter the space travel market. (National Geographic, 2015).

Private sector involvement in space travel seemed inevitable, as private companies face fewer political and economic obstacles than most government-run programs. (National Geographic, 2015).
