

# OpenAthens Update

---

# Status by consortium

- USG—Complete
- TCSG—Complete
- AMPALS—1 institution remaining
- GPALS—16 of 25 institutions complete or underway

# GPLS

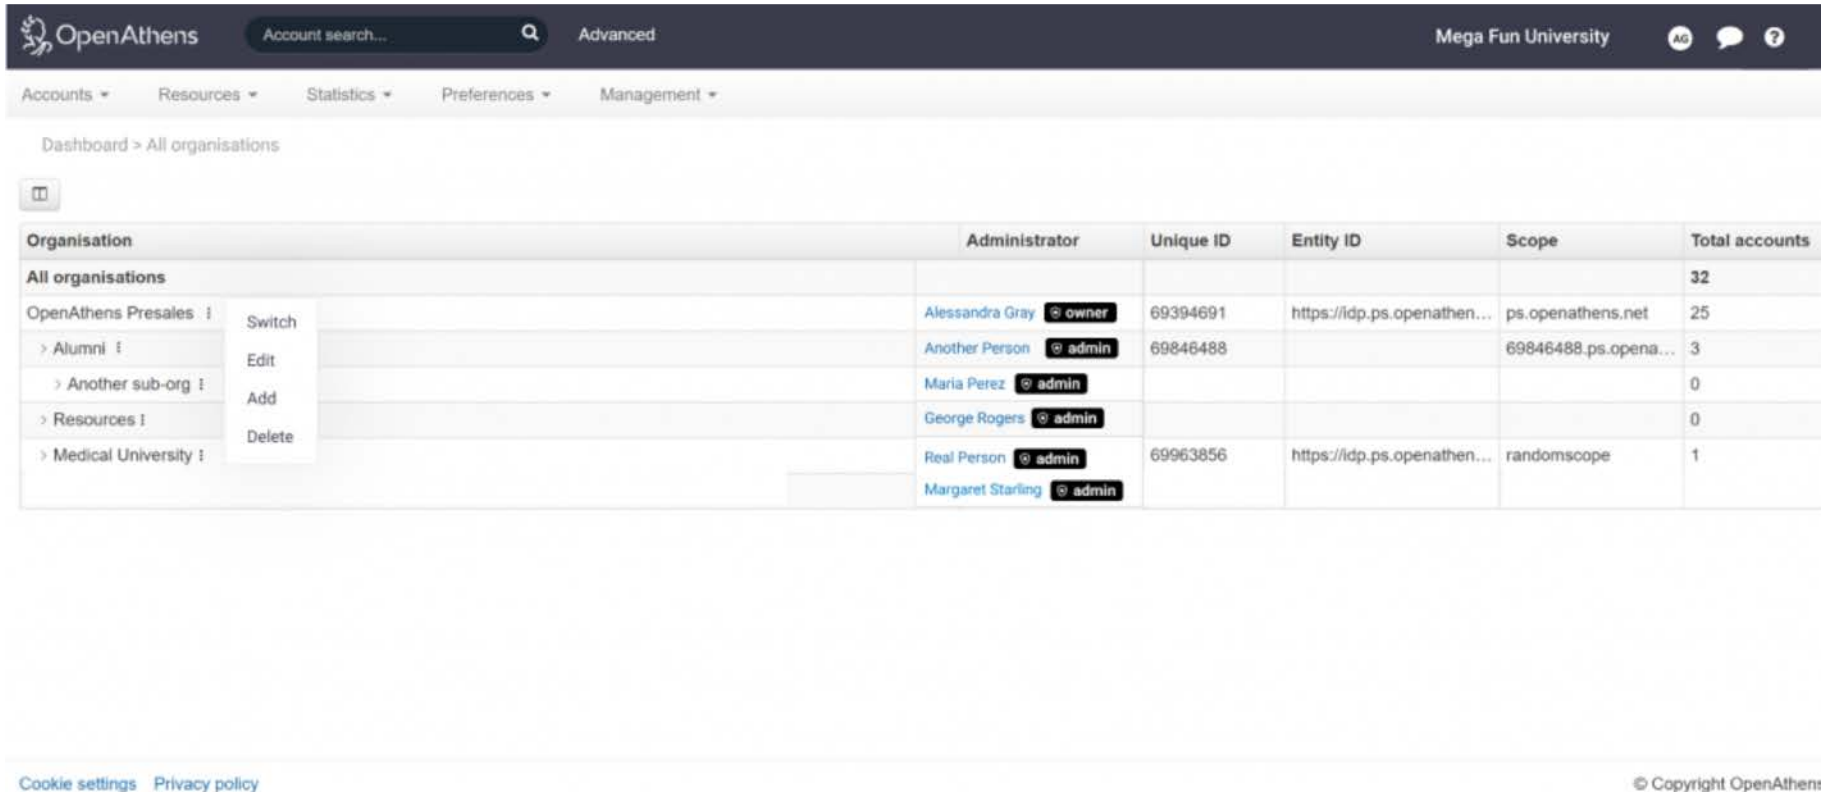

- Underway—Live Oak Public Library is our patient PINES pilot
- Some delays...
  - Stopped to repair an access issue using OpenAthens
  - GPLS libraries are already partially on OpenAthens whether you know it or not 😊
  - Work will continue summer/fall
  - Planning cohorts

• Connection refused by ebookcentral.proquest.com, please try again later.

# K-12

- COVID-19 changed priorities for both GALILEO and a very busy GaDOE IT staff
- Will restart conversations soon
- Massive project

# OpenAthens: Now Supports Multiple Admin Users

The screenshot displays the OpenAthens administration interface. At the top, there is a dark navigation bar with the OpenAthens logo, an account search bar, and the text "Advanced". On the right side of this bar, it says "Mega Fun University" with user initials "AG" and icons for chat and help. Below the navigation bar is a light gray menu bar with links for "Accounts", "Resources", "Statistics", "Preferences", and "Management".

The main content area shows a breadcrumb trail "Dashboard > All organisations" and a small icon of a table. Below this is a table with the following columns: "Organisation", "Administrator", "Unique ID", "Entity ID", "Scope", and "Total accounts".

Organisation	Administrator	Unique ID	Entity ID	Scope	Total accounts
<b>All organisations</b>					32
OpenAthens Presales : > Alumni : > Another sub-org : > Resources : > Medical University :	Alessandra Gray @ owner Another Person @ admin Maria Perez @ admin George Rogers @ admin Real Person @ admin Margaret Starling @ admin	69394691 69846488   69963856	https://idp.ps.openathen...    https://idp.ps.openathen...	ps.openathens.net 69846488.ps.opena...   randomscope	25 3 0 0 1

On the left side of the table, there is a context menu with the following options: "Switch", "Edit", "Add", and "Delete".

At the bottom of the page, there are links for "Cookie settings" and "Privacy policy" on the left, and a copyright notice "© Copyright OpenAthens" on the right.

### In the Spotlight

**PROFESSIONAL DEVELOPMENT COLLECTION**  
The Professional Development Collection provides access to journal articles and pamphlets designed especially for professional educators. It includes abstracts for 800 professional development titles, full text for over 500 journals covering the most current topics in the field of education, and 160 education pamphlets.

**ERIC (AT EBSCOHOST)**  
The Educational Resources Information Center provides publications for education and educational research, including journal and non-journal bibliographic information, with links to full text when it is available.

**PROQUEST Ebook Central™**  
A hub of 1 million-plus ebooks (with 100,000 new titles added each year) from more than 750 publishers; content includes business and finance, public affairs, literature, health and more.

**EBSCO EBOOKS ACADEMIC COLLECTION**  
A multidisciplinary collection that includes thousands of curated ebooks (updated quarterly) covering a large selection of subjects from leading university presses and academic publishers.

**ACADEMIC SEARCH COMPLETE**  
An EBSCO database providing full-text, scholarly research in journals, periodicals, reports, books and more across a variety of subjects, such as animal science, biology, law and geology.

**DIGITAL LIBRARY OF GEORGIA**  
A gateway to Georgia's history and culture found in primary sources, including digitized books, manuscripts, images, government documents, newspapers, maps, video and other resources.

# Iterative Development Continues: Features Released Since July 2020

[PowerNotes \(Free Version\)](#)

[ZoteroBib \(Bibliography Generator\)](#)

## Shareable links to views or A-Z lists

### Shareable Links

Shareable links are persistent links to pages like the GALILEO Databases A-Z list. These links can be shared on a web page, bookmarked, added to a learning management system page, etc. Users may be prompted to login prior to accessing GALILEO views or databases from the A-Z lists.

#### Shareable Links to Public Libraries Views

Shareable links are provided for each of the Public Libraries views available in GALILEO. These links provide direct and persistent access to the views so that librarians can provide a link to a grade level appropriate GALILEO site for their users. Each view contains a customized search and links to databases for that age group.

##### GALILEO Homepage - Elementary School View

##### GALILEO Homepage - Full View

[Shareable Link](#)

#### Shareable Links to Public Libraries Databases A-Z Lists

The A-Z List shareable links provide direct access to the A-Z list of databases for each of your institution's Public Libraries views. Each list is customized to meet the information needs for that age range. Shareable links provide a simple way to share grade level specific GALILEO databases on your library website. When off campus, users will be prompted to login when they access a specific database from the list.

## PORTAL REDESIGN INFORMATION

This webpage is intended to update the public (especially librarians and admin contacts) on important dates, webinars and guidelines associated with the GALILEO portal redesign project.

The first phase of the GALILEO Search redesign was completed in July 2020. It included changing the way the homepage looks, as well as upgrades to how users find resources and databases. The second phase will include additional refinements, including a bento box results display available to the public in July 2021.

The GALILEO development team consistently works to upgrade GALILEO Search, and ongoing improvements will also be publicized here.

[Timeline](#) [Webinars](#) [Guidelines](#) [Release Notes](#)

### June 4 Release Notes

- Added ZoteroBib to Tools area on main GALILEO Search page (ZoteroBib helps you build a bibliography instantly from any computer or device, without creating an account or installing any software.)
- GALILEO database search enhancement: The formats, subjects, keywords, and vendors shown on the "more" page now link to a search.
- GALILEO Admin enhancement: Institutional admins can now choose to exclude the PowerNotes and ZoteroBib links that normally show on the GALILEO Search page in the tools area.
- GALILEO Admin enhancement: Added new fields to resources. New fields include "serial count" and "resource category"
- Minor fixes/improvements to IP and password authentication

### Living in a tiny world: reproductive biology and population ecology of the Neotropical miniature frog *Euparkerella aff. brasiliensis* (Terraranae, Strabomantidae).

Ardenghi Fusinato, Luciana; Diniz, Bruno Lamy T.; Soares de Siqueira, Andreza; Van Sluys, Monique; Sequeira, Fernando; Duarte Rocha, Carlos F.  
*Amphibia-Reptilia* – April 2020

Miniaturisation is an important evolutionary trend for amphibians and has occurred several times in independent anuran lineages. Most miniaturised frogs live in the leaf litter of tropical forests and have terrestrial reproductive modes. They are expected to have reduced fecundity in number of eggs than larger-bodied related species, but little is known about reproductive cycles and proportion of reproductive females. Lower vagility is also assumed, however, as they are difficult to observe, there is little empirical evidence about their dispersal. We studied the reproductive biology (sex ratio, sexual size dimorphism and fecundity parameters) and population ecology (growth, dispersal, and phenology) of the miniature Guanabara Frog *Euparkerella aff. brasiliensis* (< 20 mm). We collected and analysed 75 specimens of *E. aff. brasiliensis*, of which 27 were adult females with vitellogenic oocytes in their ovaries. Fecundity was low for number of eggs (average number = 9.7), but only one adult female had no vitellogenic oocytes. Sex ratio was relatively balanced among sexes, being female-biased (0.92) for all individuals and male-biased (1.17) for adults. Juveniles and ovigerous females were observed throughout the year during the two years of mark-recapture study, which indicates continuous breeding. We captured 121 individuals, of which 12% were recaptured in their original collection sites, suggesting low vagility. We discuss our findings considering the current knowledge about the ecology of miniaturised frogs and other Terraranae and suggest future directions for ecological studies and conservation planning. [ABSTRACT FROM AUTHOR]

# GALILEO Bento Search Training

## Using the New GALILEO Bento Search

In this 30-minute webinar, attendees will learn to use the new GALILEO (Beta) bento style search.

### **After this session, attendees will be able to:**

- Engage the beta bento search
- Switch between bento and the standard EBSCO Discovery search
- Navigate search results in the bento box environment
- Review “more results” pages and navigate to additional results in the standard EBSCO Discovery search
- Identify the source content within each bento box
- Learn about forthcoming updates to the bento search
- Provide feedback on the bento search
