## MORE SYSTEMWIDE TOTALS

Including eCore, 19% of sections statewide have no-cost materials.

Sections with low-cost materials have increased, from 3.66% in fall 2019 to 4.4% in spring 2020.

## INSTITUTION HIGHS AND LOWS

- ▲ ABAC reports 89% of their sections as no- or low-cost. A year ago, none were reported.
- ▲ UGA started reporting low-cost materials sections for the first time, with 6.6% designated.
- ▲ Georgia Tech had only 7% of sections listed as no-cost last year; that has jumped to 63%.
- ▼ Georgia Southern is still reporting no-cost materials for less than 1% of their courses.
- ▼ Middle Georgia, which reported 23% of sections as no-cost in spring 2019, dropped below 1%.
- ▼ Several institutions are still reporting low-cost sections at or close to 0% (Albany, Atlanta Metro, East Georgia, Middle Georgia). Overall, it's likely that low-cost sections are still being massively under-reported. It's unlikely that only 4.4% of sections have texts that cost less than \$40.

## 1 MILLION DOWNLOADS!

Affordable Learning Georgia has surpassed 1 million downloads of full-text open educational resources — more than half of which occurred in the past year.
