Britannica

Source: Britannica Reporting Tool

<http://statistics.eb.com/help/definitions>

- **GALILEO Searches = Britannica Queries:** All queries including keyword searches, advanced searches, media browse, primary source browse, learning materials browse, as well as grade-level and category filtering, etc.
- **GALILEO Full Text = Britannica Documents:** All text-based resources, including encyclopedia articles, year-in-review articles, primary source documents and eBooks, journal and magazine articles, text-based learning materials, etc. A Pack “pinboard” view also counts as a document.

EBSCO

Source: EBSCO Administrative Portal

Report Used: Standard Usage Reports/Database Usage Report

https://help.ebsco.com/interfaces/EBSCOadmin/Admin_User_Guide/EBSCOadmin_Standard_Reports_Column_Definitions

- **GALILEO Searches = EBSCO Searches*:** When an EBSCO user looks up data, this look-up is registered as a Search. The total number of Searches logged by our system can optionally be reported by EBSCOadmin and they can be broken down by Site, User Group or Profile.

- **GALILEO Database Sessions = EBSCO Session:** Session: A user Visit to an EBSCO interface (EBSCOhost, Consumer Health Complete, Student Research Center, etc.) Each unique Visit to these interfaces is counted as a Session. When a user visits one of these interfaces a Session ID is generated. This ID becomes active for 24 hours and multiple users may access the interface using this Session ID thus incrementing the Session count for this one SessionID.
- **GALILEO Full Text = EBSCO Total Full Text Request:** The sum of all Full Text requests made while within an EBSCO interface
- **GALILEO Citations = EBSCO Abstract:** The sum of Abstract records that has originated from a set of search results.

Films on Demand

Source: Films on Demand Administrative Portal

Report Used: Activities Report

<http://support.infobaselearning.com/index.php?videofod/Knowledgebase/Article/View/2258/0/usage-stats-glossary>
